Shop with Innovative Dehumidifier Systems for all your residential or multi-family dehumidification needs.

Remove Moisture | Help Improve IAQ
It's That Simple.

Innovative Dehumidifier Systems

The tankless dehumidification experts.

WH120

The WH120 removes an impressive 120 pints of moisture/day (80°F, 60%) from areas up to 21,000 cubic feet, making it ideal for larger spaces. At 16" tall, it's compact in size and can be ducted on both inlet and outlet, perfect for crawl spaces, basements, or whole house applications.

The WH120 features a digital display, auto defrost, auto restart, and low-temperature operation - plus, it's compatible with optional accessories, the Remote Control Package and wH120 Collar Kit.

WH85

The WH85 can remove 85 pints of moisture/day (80°F, 60%) up to 15,000 cubic feet, and a COP of 2.71 L/kWh - this unit is a mighty performer in a small package, making it ideal for large crawl spaces.

User-friendly features include a digital display, low-temperature operation, and auto defrost, and it's compatible with optional upgrades including the Remote Control Package and the WH85 Collar Kit.
